PageNotes With Key Free Download

PageNotes Torrent Download is a lightweight software application built specifically for helping you store your bookmarks in a clean and intuitive working environment. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to save bookmarks on the breeze, without having to go through installation steps. User-friendly interface PageNotes sports a clean and simple layout that offers only some basic functions to tinker with. You can insert links using Copy and Paste functions, so you cannot rely on "drag and drop" operations. Everything is kept as simple and clean as possible, so even rookies can configure the dedicated parameters with minimal effort. Basic functions The program gives you the possibility to add multiple links to the list, use hotkeys for a better control over the entire process (they cannot be reassigned), remove the selected URL, as well as clear the entire list with just one click. What's more, you can insert additional notes about each bookmark, copy to the clipboard the link or note, or both of them, and refresh the current information. Another notable characteristic worth mentioning is represented by the possibility to save all your bookmarks to HTML file format and access them via a web browser-driven interface. The program displays the notes and with just one click on one of them, it opens it in a separate window. Last but not least, you may open the selected URLs with your web browser on the go. During our testing we have noticed that PageNotes carries out a task quickly and without hampering your system performance. Bottom line To sum things up, PageNotes offers a handy yet efficient software solution for helping you manage your bookmarks. It comprises basic functions which make it an ideal app for rookies. However, it would have been useful to see support for sorting, organizing, and searching options. Pros Basic yet effective. The overall functionality is adequate. Smooth and fast operation. Easy to use. All features easily accessible. Cons Not compatible with our browsers. Didn't offer a longer list of bookmarks. Installation process is lengthy, and there are many steps involved. PageNotes is a lightweight software application built specifically for helping you store your bookmarks in a clean and intuitive working environment. The advantages of being portable Since

PageNotes Keygen Free Download

PageNotes is a lightweight application which can be installed on Windows 7 and Windows 8. It will work on all the different configurations of Windows 7 and Windows 8 such as 32 bit and 64 bit, and both 32-bit and 64-bit configurations of Windows 8, and supports all the latest Windows versions through XP and Windows 7. It is a portable application. PageNotes does not require installation. It is a web browser application which works on any PC that has internet connection on it. You need not worry about registry or any such thing because it does not embed itself in the registry. You can easily move it on any USB flash drive and take it with you wherever you go. Most helpful customer reviews I have been using this free utility for years and today I found the extension for Google Chrome browser which enabled me to browse internet even when the Internet Explorer is not on. It doesn't allow you to surf on the Internet but it does mark pages for later reading. It improves the reading speed by filtering out unwanted clutter and allowing you to concentrate on the words. It helps you retain even the lengthy pages. Page Notes is the best way to fasten the reading speed. You can type the URL into the search box and it will show all the Page Notes which contain that URL. If you need to add a page to your file, simply click on the bookmark and it will open that Page Notes in your chosen web browser. If you are thinking of using any other extension it will be not worthwhile because Page Notes extension works perfectly without leaving any sign on the browser. In an occasion where the Internet browser of your PC is not functioning you can also use this utility to create and manage notes for your favourite pages and read it from any other browser. Chrome extension is a security risk. It can be disabled by changing chrome://extensions/ within the browser. I also wish to point out that "Page Notes" extension will collect all of your bookmarks, even those which you do not wish to track. To turn this off, switch to the privacy settings and select "which websites can see your browsing history" and then "delete history." No data is being collected. Uninstalling this extension will have the same effect. Also, when visiting a page in Chrome, you can press the Page Notes button located at the bottom of the screen and all your open pages will be listed. You can mark them, star them, make a note of them, etc. On the whole,
