AutoCAD [32/64bit] [Latest-2022]

Software in the AutoCAD suite consists of the AutoCAD drawing system, 3D modeling tools, 3D printing software, cloud based 3D services, and other applications such as Inventor. In 2015, the largest software companies were Autodesk with over \$2.9 billion in revenue, and Adobe with \$2.2 billion. The Autodesk Academic Initiative (A2I) is a program created by Autodesk to provide an affordable way to access Autodesk software for academic users, and related resources and training materials. Approved universities and colleges in the United States can apply to participate in the A2I. Students at participating colleges receive a discount on their software purchase when they use the Autodesk Learning Network (ALN) to register for their classes and gain access to Autodesk software for course use. Colleges and universities that wish to participate in A2I may do so by contacting the Autodesk Academic Initiative Program Manager, A2I@autodesk.com. Autodesk has come under a lot of pressure from the U.S. government to improve the way it reports to the Securities and Exchange Commission (SEC) for its public filings. Autodesk announced the Autodesk 2020 Public Cloud, a private cloud service that provides a Software as a Service (SaaS) model for Autodesk software. In addition, it announced the AutoCAD 360 SaaS application and the three new AutoCAD cloud offerings for greater data protection and security. Autodesk is also moving into an autonomous growth phase. In October 2014, Autodesk announced it had entered a definitive agreement to be acquired by media and information technology (IT) company Dassault Systèmes for \$42.11 per share.
